Reference Patent Application # 10/627,286 - Designated 'Abandon'
[electromagnetic brain animation]
Priority Follow Up

Attention Office Of Petitions

Documentation sent to me indicating reasons for designation of 'abandonment' for patent application noted above is completely incorrect to its very foundation. Such designation needs to be reversed immediately. Thank goodness for decent record keeping. There are a total of two [2] reasons stated for 'abandonment:'

Examples: X-Applicants failure to timely file a proper reply to letter send 23 March 2006.

In actually fact, we did reply one month following the request [rather than the 3 months allowed] with all amended claims. We have **certified mail verification** of all corrected claims sent to John Layck on April 24, 2006. We also have follow up **phone records, fax records and recording records**. In actual fact, USPTO lost all of our application correction information - and then found them again some time later. [John is aware of all of this and I'm sure if asked he certainly would not lie.

Y Your statement that the application actually became abandon on June 24, 2006 doesn't make good sense on a number of levels. I spoke with and communicated with our examiner on that very date and 13 times after that date. He verified every time that things were 'crawling along and apologized profusely for the whole process of what has happened to this patent application. He mentioned nothing in all of those conversations that there was any worry concerning abandonment; in fact, the topic of abandonment wasn't brought up at all.

The multitude of validating documents do not copy well either too or from our fax areas. I will included them with a certified, priority letter sent along with the information I have faxed here.

Cordially,

Bill
